

# KIWI CAN SCHOOL COMMUNITY PROJECT

As part of the KIWI CAN Programme in schools, students undertake a community project. Given the school's links over the years with the LinkPATHWAY and the community's interest in integrating this with a potential boardwalk, this seems like a most fitting endeavour.

Tomorrow, Wednesday 10 Sep, students will be leaving the school at 10:00 for a 10:30 briefing just beyond the causeway before they set about filling out the area with more native seedlings. Landscape Marlborough will again be on hand to assist and have already done some prepping of the site and arranged the seedlings. Kelvin, Di and Sophia, our Kiwi Can leaders will also be lending a hand.

We are taking our lunch and a drink so we can enjoy a little of the spring weather in the great outdoors. We anticipate being back on campus at or around 13:00 having planted another bunch of trees at the point where the LinkPATHWAY is to cross the road and head up the hill.

Please join us and bring a spade, some lunch, a drink, some sensible shoes and suitable clothing for either sun or a cool breeze. Students should be similarly prepared.
